CLAIMS

What is claimed is:

- A high-security card, comprising:
- 5 a card body having a perimeter and at least one face; and
- at least one two-dimensional binary information
 symbol, said at least one symbol being located
 within said perimeter of said card body on said
 at least one face.
 - 2. The high-security card of claim 1, adapted for use as a high-security transaction card.
- 15 3. The high-security card of claim 1, adapted for use as a high-security identification card.
 - 4. The high-security card of claim 1, adapted for use as an economical, disposable identification card.

20

5. The high-security card of claim 1, adapted for use as a library patron identification and circulation control card.

- 6. The high-security card of claim 1, adapted for use as a building access card.
- 7. The high-security card of claim 1, adapted for use as5 a medical information and patient history card.
 - 8. A high-security card system, comprising:
- at least one high-security card, said high-security

 card including (i) a card body having a perimeter

 and at least one face, and (ii) at least one two
 dimensional binary information symbol, said at

 least one symbol being located within said

 perimeter of said card body on said at least one

 face;
- at least one card reader, said reader being responsive

 in use to said at least one symbol of said at

 least one high-security card and generating a

 signal indicative of said symbol; and
 - at least one decoder, said decoder being capable of

 (i) receiving said signal from said at least one

 card reader, and (ii) converting said signal into

 a human-readable authentication display.

20

- 9. The high-security card system of claim 8, adapted for use as a high-security transaction card system.
- 10. The high-security card system of claim 8, adapted for use as a high-security identification card system.
 - 11. The high-security card system of claim 8, adapted for use as an economical, disposable identification card system.

10

- 12. The high-security card system of claim 8, adapted for use as an economical, disposable identification card system.
- 15 13. The high-security card system of claim 8, adapted for use as a library patron identification and circulation control card system.
- 14. The high-security card system of claim 8, adapted for20 use as a building access card system.
 - 15. The high-security card system of claim 8, adapted for use as a medical information and patient history card system.
